Styling & Customizations:

I applied a calm and earthy design inspired by matcha aesthetics. Specifically, I customized:

1. Custom Fonts:

- Used Quicksand for body text and Playfair Display for headings via Google Fonts.

2. Color Scheme:

- Background color: soft cream (#f5f5f0) for a warm, natural feel.
- Header and footer: light matcha green (#d4e9c6).
- Text and link colors: deep green tones to match the matcha theme.

3. Layout Adjustments:

- Centered content with consistent padding and margins.
- Styled the navigation bar with spaced links.
- Applied shadows and rounded corners to images to give them a smooth, aesthetic look.

4. Images:

- Included personal matcha photos like strawberry and chai matcha drinks to customize the site.
